

Quant Alpha Camp & Agentic AI Alphathon

Discussion deck

For partners, mentors, sponsors, and operators

Build AI-assisted alpha researchers

QuantCorner x .shmu

What we are building

A practical pathway from market curiosity to alpha research output.

Portfolio Summary

Return (1M)	2.31%	Turnover (1M)	32.6%
Volatility (1M)	4.12%	Max Drawdown	-3.21%
Sharpe	1.23	Avg. Exp. (Month)	0.23

Top Signals (Live)

Signal	IC (1M)	IR (1M)	T-Stat
alpha_041	0.073	1.42	2.15
alpha_128	0.061	1.28	1.96
alpha_207	0.058	1.11	1.72
alpha_309	0.056	0.98	1.56
alpha_S12	0.038	0.76	1.21

① Learning experience

Beginner-friendly
quant alpha
foundations

Core concepts

Hands-on
exercises

Alpha
mindset

Peer
learning

② Build sprint

Turn ideas
into platform-
ready
prototypes

Data

Signals

Build

Test

Deploy

③ Talent signal

Identify
committed
learners
through
proof-of-work

Attendance
quality

Alpha
cards

Platform
builds

Demo
quality

Not a seminar. A research-and-build pipeline.

Factor Statistics

IC Mean	0.056
IR	1.37
T-Stat	2.89
Win Rate	57%
Exposure Neutral	Yes

Why **now**

AI makes alpha idea generation faster.

Research discipline decides what survives.

More
ideas

Need
better filters

More
tools

Need
repeatable workflow

More
learners

Need
observable proof-of-work

★ The opportunity is not AI prediction. It is AI-assisted research throughput.

Who this is for

Mixed-level learners who can become builders, researchers, or community contributors.

Portfolio Summary

Return (1M)	2.31%	Turnover (1M)	32.6%
Volatility (1M)	4.12%	Max Drawdown	-3.21%
Sharpe	1.23	Avg. Exp. (Month)	0.23

Performance (Cumulative)

Turnover

1 Day 1: Alpha Foundations

★ Output:
3 Alpha Cards

2 Day 2: Idea Sources

★ Output:
4 Idea Cards

3 Day 3: Platform Build

★ Output:
1 working demo

4 Day 4: AI-Assisted Demo

★ Output:
final thesis + shortlist

Day 1: Alpha Foundations

Turn trading **opinions**
into **testable signals**.

09:00

What is Alpha?

Learn: signal vs opinion

Do: classify examples

Outcome: alpha definition

10:00

Quant Investment Process

Learn: idea→data→test→review

Do: map process

Outcome: research framework

13:00

Find Alpha Ideas

Learn: sources of alpha

Do: build hypotheses

Outcome: idea shortlist

15:00

Alpha Discovery Lab

Learn: testability

Do: write cards

Outcome: 3 Alpha Cards

Day 2: Alpha Idea Sources

Use **FA** and **TA** as raw material for quant hypotheses.

Two lenses.
Stronger
hypotheses.

🕒 09:00–12:00

Fundamental Ideas

- ✓ **Learn:** value, quality, growth, revisions
- ✓ **Do:** convert business logic to metrics
- ✓ **Outcome:** 2 Fundamental Alpha Cards

🕒 13:00–16:00

Technical Ideas

- ✓ **Learn:** momentum, reversal, volume, volatility
- ✓ **Do:** convert chart intuition to rules
- ✓ **Outcome:** 2 Technical Alpha Cards

🕒 16:00–17:00

Conversion Lab

Turn idea into a test.

Idea

metric

signal rule

horizon

failure mode

Select 1-2 ideas
for build day

Day 3: Platform Track Day

Build Track: From Alpha Idea to Platform Prototype

🕒 09:00-10:00 Shared: Idea → Testable Signal

Track A: WorldQuant Brain

🕒 10:00-12:00 Brain alpha simulation

🕒 13:00-15:30 Hands-on platform lab

💡 **Learn:** expression thinking, simulation metrics, quality gates

✍️ **Do:** convert 1 idea into Brain expression

🏆 **Outcome:** 1 simulated alpha candidate + research log

Track B: Webull API / MCP

🕒 10:00-12:00 API / MCP strategy workflow

🕒 13:00-15:30 Hands-on platform lab

💡 **Learn:** data retrieval, signal calculation, alert workflow

✍️ **Do:** convert 1 idea into Webull prototype

🏆 **Outcome:** 1 API/MCP strategy prototype + demo script

🕒 15:30-17:00 Cross-track demo + submission checklist

Factor Statistics

Mean	0.031

alpha_207	0.058	1.11
alpha_309	0.056	0.96
alpha_512	0.038	0.76

Day 4: AI-Assisted Build Track

Use AI Agent loops to improve, explain, and present alpha work.

What participants leave with

A repeatable alpha research operating system.

Factor Statistics

Mean	0.031
Std Dev	0.087
Skew	-0.41
Kurtosis	3.21
Win Rate	57%

Portfolio Summary

Return (1M)	2.31%
Volatility (1M)	4.12%
Sharpe	1.23
Turnover (1M)	32.6%
Max Drawdown	-3.21%

Top Signals (Live)

Signal	IC (1M)	IR (1M)	T-Stat
alpha_041	0.073	1.42	2.15
alpha_128	0.061	1.28	1.96
alpha_207	0.058	1.11	1.72
alpha_309	0.056	0.98	1.56
alpha_512	0.038	0.76	1.21

Alpha Idea Cards

- ✓ 1 idea = 1 card
- ✓ Hypothesis
- ✓ Logic to metrics
- ✓ Test plan

Research Log

- ✓ Experiments
- ✓ Results & IC
- ✓ Decays / Turnover
- ✓ Learnings

Signal Prototype

- ✓ Factor / Signal code
- ✓ Backtest summary
- ✓ Risk & exposure
- ✓ Parameter log

AI Agent Prompt Log

- ✓ Prompts used
- ✓ Agent outputs
- ✓ Iterations
- ✓ What worked / failed

Demo Deck

- ✓ Story & thesis
- ✓ Key charts
- ✓ Live demo flow
- ✓ Takeaways

Next 30-Day Plan

- ✓ Refinements
- ✓ New data / ideas
- ✓ Milestones
- ✓ Owner & cadence

The goal is not completion. The goal is repeatable research behavior.

How partners can plug in

Flexible roles depending on what each stakeholder can contribute.

Portfolio Summary

Return (1M)	2.31%	Turnover (1M)	32.6%
Volatility (1M)	4.12%	Max Drawdown	-3.21%
Sharpe	1.23	Avg. Exp. (Month)	0.23

Top Signals (Live)

Signal	IC (1M)	IR (1M)	T-Stat
alpha_041	0.073	1.42	2.15
alpha_128	0.061	1.28	1.96
alpha_207	0.058	1.11	1.72
alpha_309	0.056	0.98	1.56
alpha_512	0.038	0.76	1.21

Signal Quality

IC Mean	0.056
Coverage	62%
Decay (Half Life)	16.3
Stability	0.78
Fitness	0.64

Speaker / Mentor

- ✓ teach
- ✓ review
- ✓ give feedback

Platform Partner

- ✓ tools
- ✓ APIs
- ✓ data access

Community Partner

- ✓ reach
- ✓ recruitment
- ✓ venue

Sponsor

- ✓ budget
- ✓ prizes
- ✓ promotion

Hiring / Talent Partner

- ✓ shortlist
- ✓ interviews
- ✓ next steps

Pick
the role.

Define
the output.

Measure
the result.

What we **need** to decide

A simple checklist for the next conversation.

① Target cohort

who should join first

② Partner roles

who teaches, funds, hosts, reviews

③ Platform path

which tools and outputs matter

④ Launch plan

date, owner, budget, promotion

Discuss

Scope

Confirm

Launch

leave with one next action
