Source: Bloomberg Finance L.P., Dow Jones, FactSet, J.P. Morgan Economic Research, MSCI, J.P. Morgan Asset Management. The "Diversified" portfolio assumes the following weights: 55% in the MSCI World Index (DM Equities), 10% in the MSCI Thailand (Thai Equities), 5% in the Bloomberg Barclays Aggregate (Global Bonds) and 30% in the J.P. Morgan GBI-EM Global Diversified Thailand (Thai Bonds). Other indices include Bloomberg Barclays Global Corporate High Yield Index (Global Corporate High Yield), MSCI AC Asia Pacific ex-Japan (APAC ex-JP), J.P. Morgan Asia Credit Index (Asian Bonds) and Bloomberg Barclays U.S. Treasury -Bills (1-3 months) (Cash). Diversified portfolio assumes annual rebalancing. All data represent total return in U.S. dollar terms for the stated period. 10-year total return data is used to calculate annualized returns (Ann. Ret.) and 10-year price return data is used to calculate annualized volatility (Ann. Vol.) and reflect data as of the latest month-end. Past performance is not a reliable indicator of current and future results. Diversification does not guarantee investment returns and does not eliminate the risk of loss.  
Guide to the Markets – Asia. Data reflect most recently available as of 30/06/24.

Investment

Long-term holding with long-term objective

Gradually build wealth over time

Ride out short-term volatility and focus on upward trend of the market

Generally lower transaction costs

Trading

Buy and sell assets in a minutes to weeks or months

Profit from short-term price changes

Frequent and quick transaction may lead to significant losses if market moves against the position

Higher costs due to frequent transactions

## Define Your Financial Goals

- Identify your objectives
- Measurable goals
- Define time horizon

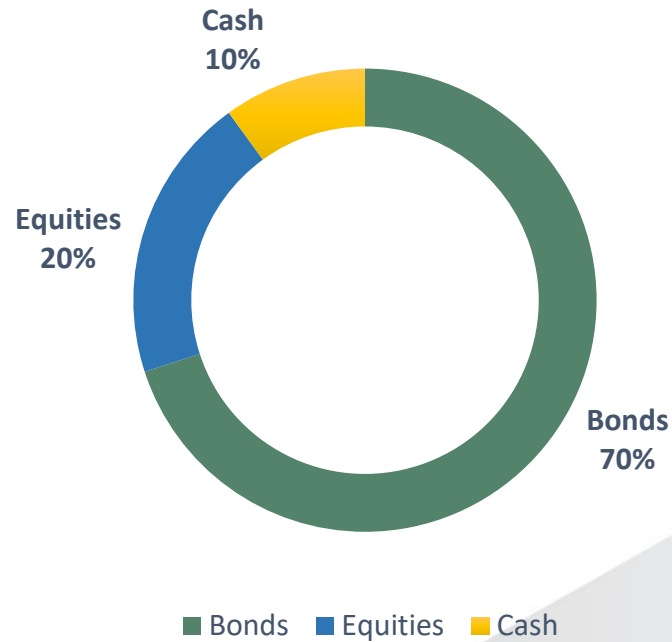

## Assessing Your Risk Tolerance

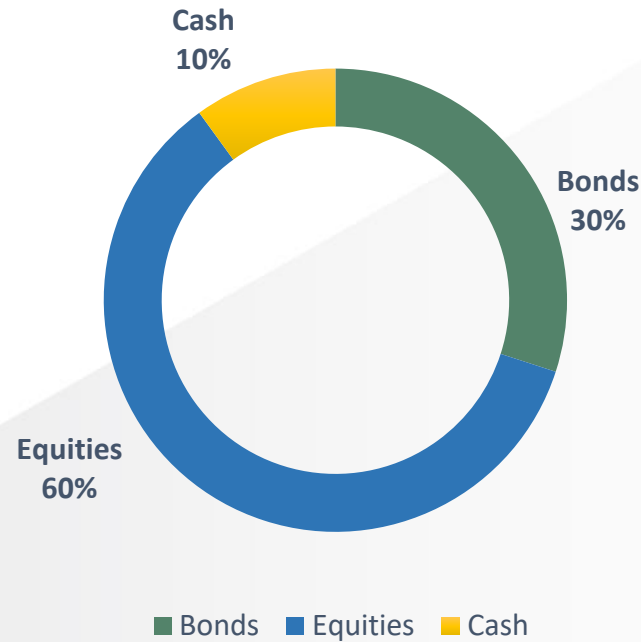

- Income stability
- Savings and emergency fund
- Debt level
- Take a risk questionnaires
  - Conservative
  - Moderate
  - Aggressive
- Review regularly

## Example of Portfolio Asset Allocation

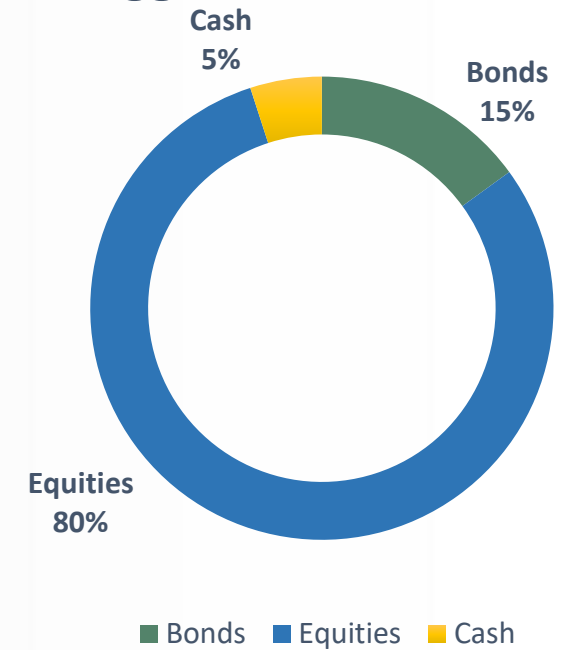

### Conservative Portfolio

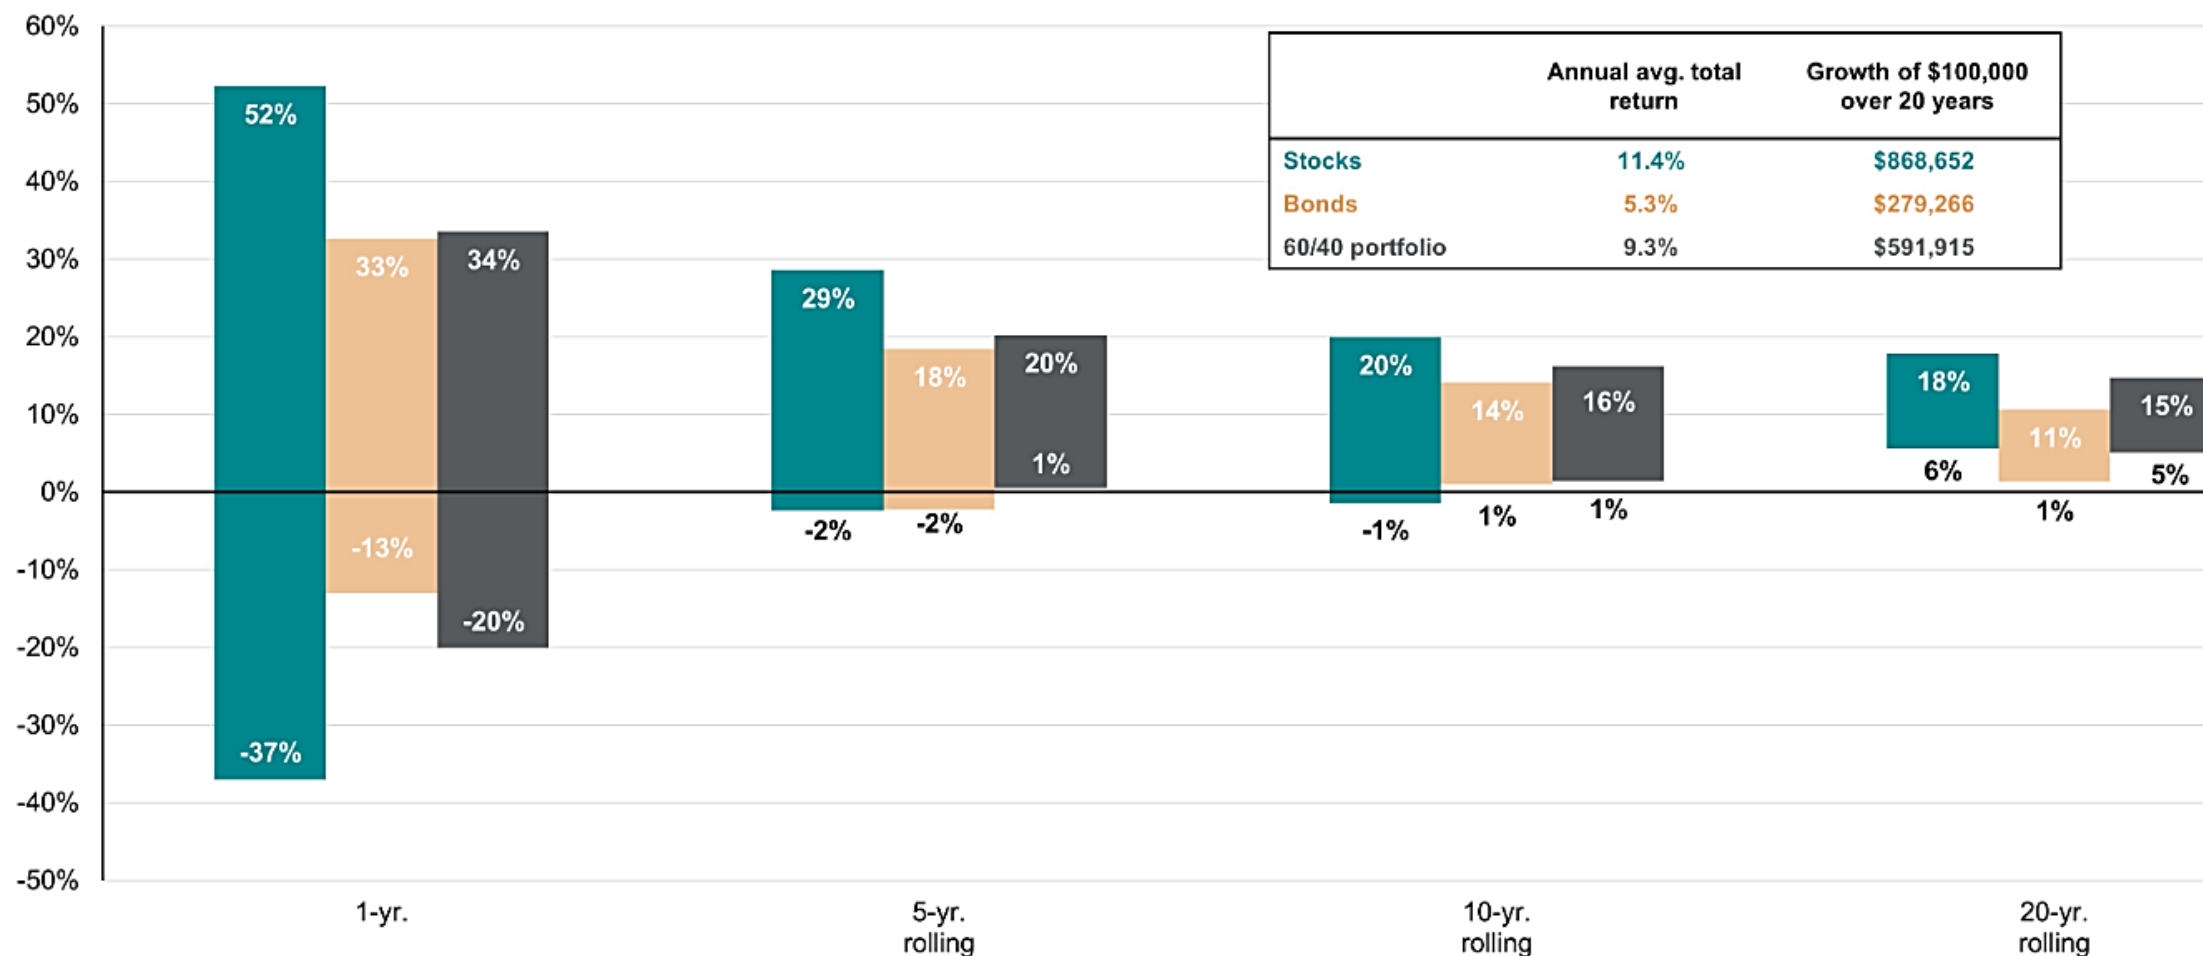

### Moderate Portfolio

### Aggressive Portfolio

- Rebalancing regularly
- Know the economic environment
- Periodic review your goals and risk tolerance
- Keep learning and stay invest

## อัตราดอกเบี้ยเงินฝาก และอัตราดอกเบี้ยที่แท้จริง

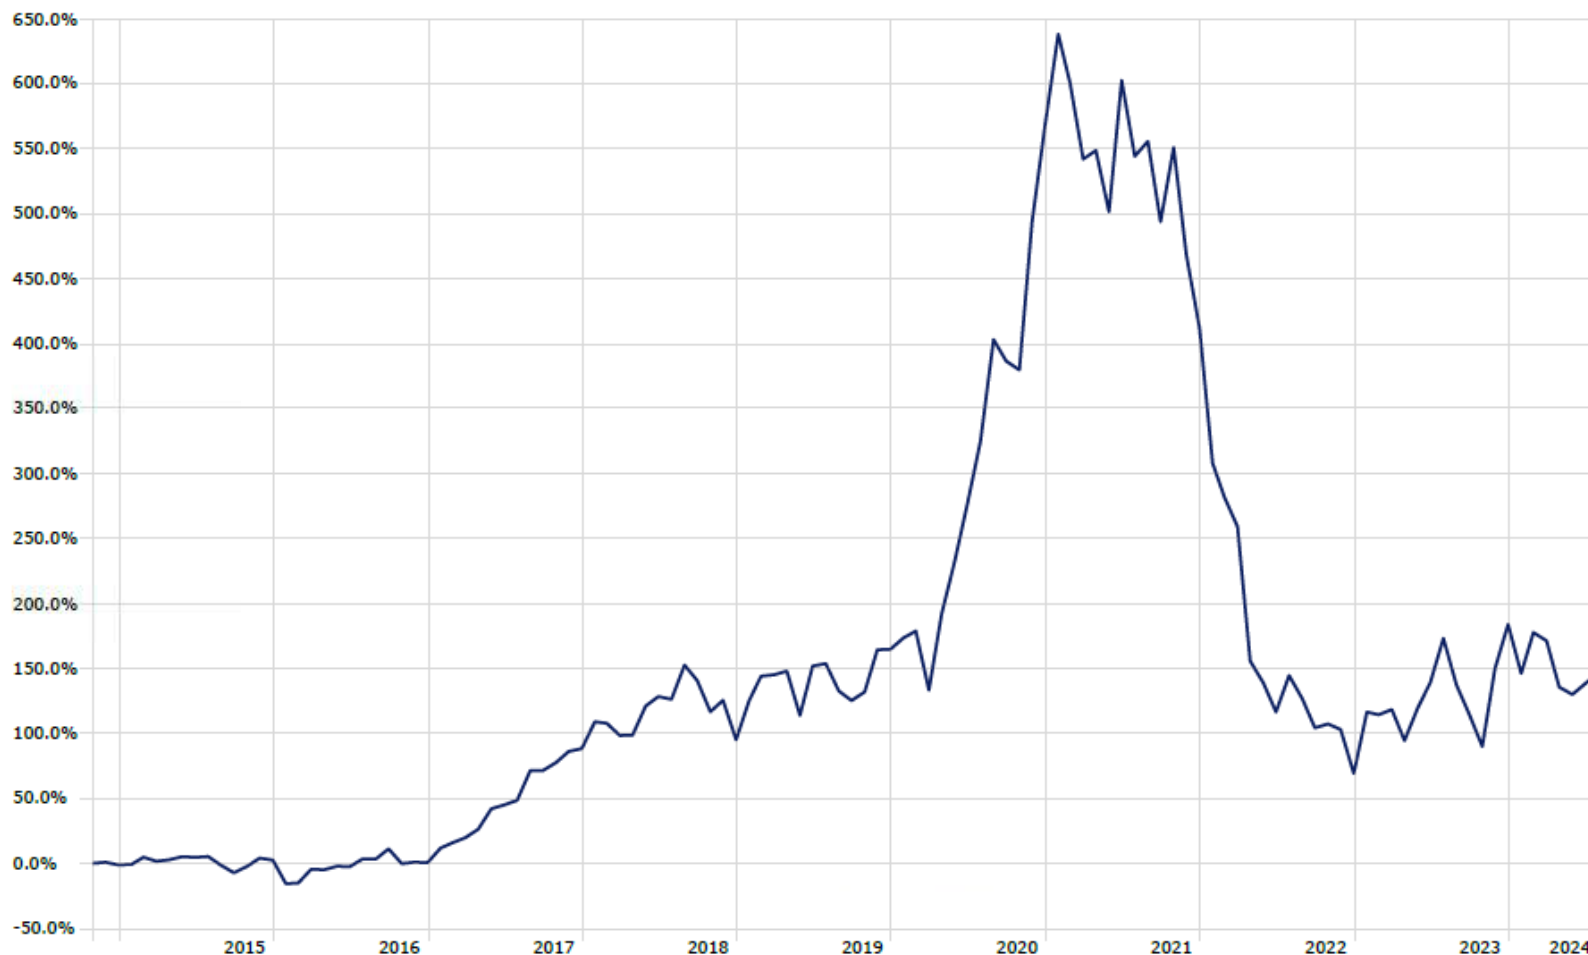

Deposit alone cannot create wealth over the long-term due to inflation

While they offer safety and liquidity, their returns are generally too low to outpace inflation over the long term.

## Investment Growth

Time Period: 11/1/2014 to 7/31/2024

A portfolio with no diversification or one that is highly concentrated is exposed to a higher level of risk due to its dependence on a limited number of assets. This increases the potential for large losses, higher volatility, and greater psychological stress.

## Better Solution – Diversify and DCA

Diversification

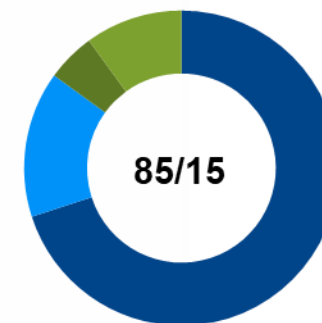

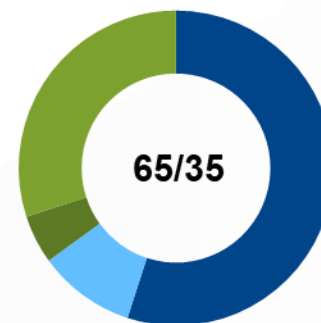

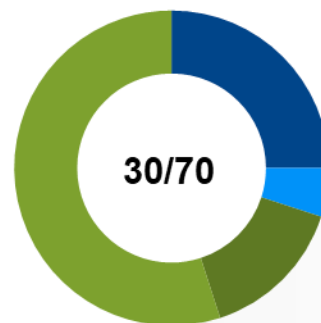

Dollar-cost Averaging

Investing **smaller amounts regularly** means less stress for investors—even in a turbulent market
