Global Fund Manager Survey

The Frozen Bulls

BofA June Global Fund Manager Survey

FMS Bottom Line: FMS investors are steadfastly bullish (BofA Bull & Bear Indicator up to “sell signal” 8.9), albeit a tad less bullish than in May (cash level up to 4.1% from 3.9%); the history of FMS suggests this is not a “big top” for risk assets (will be signaled by bonds & voters), but traders take summer chips off table, consumer stocks best contrarian play for “peace”.

On Macro & Fed: global growth & profit optimism at 3-month highs, but optimism on macro not off-the-charts; note expectations for interest rates now highest since Sep’22; on the Fed, 40% (was 16%) forecast hikes in next 12 months, and 55% expect “hawkish hold” from Warsh at tomorrow’s FOMC vs. 33% predicting “dovish hold”.

On Risks & Crowds: biggest tail risks seen as “2nd wave inflation” (34%) and “AI bubble” (28%), most crowded trade “long global semiconductors” (80% = all-time FMS high); asked what stage of investment cycle AI stocks currently in, 56% say “boom” (i.e. FOMO = more buyers) vs. 21% say “euphoria” (price/value in danger zone – Chart 1).

On Asset Allocation & Contrarian Trades: investors trimmed global equity OW from 50% to 38%, tech OW from 33% to 26%, cut Europe stocks to biggest UW since Dec’24, bought Japan, materials & banks, now running smallest UW in US dollar since Mar’25; gold now seen as fairly valued 1st time since Feb’24; June FMS contrarian trades are long bonds, Europe, consumer, REITs, and short commodities, semis, materials, banks.

On the World Cup: and lastly, 22% of investors say Spain will win the World Cup, 19% say France, 8% say England, Brazil, or Argentina, 6% Portugal, 3% Germany.

Chart 1: 56% of FMS investors say AI stocks are in “boom” stage

Which of the following stages of an investment boom/bubble cycle are AI stocks currently in?

Source: BofA Global Fund Manager Survey. Boom: prices gain momentum and fear of missing out attracts more participants; Euphoria: prices and valuations skyrocket to extremes; Profit-taking: institutional investors start to sell in anticipation of bubble pop; Displacement: new trend or innovation attracts investor interest; Panic: loss of confidence leads to sharp fall in asset prices and widespread selling.

Disclosures

Important Disclosures

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. **VOLATILITY RISK RATINGS**, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. **INVESTMENT RATINGS** reflect the analyst's assessment of both a stock's absolute total return potential as well as its attractiveness for investment relative to other stocks within its Coverage Cluster (defined below). Our investment ratings are: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. An investment rating of 6 (No Rating) indicates that a stock is no longer trading on the basis of fundamentals. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster ^{R1}
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

^{R1} Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

INCOME RATINGS, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend. *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Due to the nature of strategic analysis, the issuers or securities recommended or discussed in this report are not continuously followed. Accordingly, investors must regard this report as providing stand-alone analysis and should not expect continuing analysis or additional reports relating to such issuers and/or securities.

BofA Global Research personnel (including the analyst(s) responsible for this report) receive compensation based upon, among other factors, the overall profitability of Bank of America Corporation, including profits derived from investment banking. The analyst(s) responsible for this report may also receive compensation based upon, among other factors, the overall profitability of the Bank's sales and trading businesses relating to the class of securities or financial instruments for which such analyst is responsible.

Other Important Disclosures

Prices are indicative and for information purposes only. Except as otherwise stated in the report, for any recommendation in relation to an equity security, the price referenced is the publicly traded price of the security as of close of business on the day prior to the date of the report or, if the report is published during intraday trading, the price referenced is indicative of the traded price as of the date and time of the report and in relation to a debt security (including equity preferred and CDS), prices are indicative as of the date and time of the report and are from various sources including BofA Securities trading desks.

The date and time of completion of the production of any recommendation in this report shall be the date and time of dissemination of this report as recorded in the report timestamp.

Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. Digital assets are extremely speculative, volatile and are largely unregulated. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.

This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.

BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.

Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.

BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.

BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein.
