EVR 2026 Defense Tech Conference (June 25th)

Schedule:

- **8:30am:** Registration & Breakfast
- **9:15-9:40am:** Welcome Remarks
- **9:45-10:15am: Panel #1:** Why the Defense Revolution is Here to Stay
- **10:30-11:45am:** 1x1 / Group Meetings
- **12:00-1:00pm:** Lunch: Conversation on Global Conflict and Competition
- **1:15-2:30pm:** 1x1 / Group Meetings
- **2:35-3:00pm:** Panel #2: Evercore ISI Defense Tech Perspectives
- **3:15-5:10pm:** 1x1 / Group Meetings
- **5:15-6:00pm:** Cocktail Reception

Participating Companies:

- Anduril
- Air
- Onebrief
- Saronic
- Second Front
- Shield AI
- Skyrise
- True Anomaly
- Ursa Major
- X-Bow Systems

A Primer on Defense Tech - 2026 Edition.

ALL YOU NEED TO KNOW: We are publishing our inaugural Defense Tech Primer ahead of Evercore's 2026 Defense Tech Conference. As geopolitical tensions intensify, AI becomes central to military operations, and we shift towards unmanned and attritable systems, we see defense technology entering a durable, multi-year secular growth era. We see tailwinds ranging from accelerating acquisition reform (DoD adopting consumer technology), emergence of frontier AI, globally synchronized rearmament, and tech modernization. With global military spending at ~\$2.9T and U.S. defense spending >\$1T, we estimate the market will reach ~\$965B by 2030, growing at ~7% CAGR from ~\$685B in 2025 driven by platforms, weapons, electronics, space, and software. Key points: **1) Demand at Multi-Decade Highs.** Record defense budgets and broad bipartisan support are enabling a sustained, multi-year investment cycle across the ecosystem. Rising geopolitical tensions are driving long-term procurement demand, with European defense spending expected to nearly triple through 2030. **2) Capital, Policy, and Procurement Reform Are Aligning.** Acquisition reform is accelerating procurement timelines and lowering barriers for emerging vendors, while The Pentagon's record \$13.4 billion AI and autonomy budget request is creating new demand vectors. At the same time, a reopening IPO market is validating a new class of "Neoprimes" at premium valuations. **3) Replenishment Represents a Multi-Year Tailwind.** Within the \$125B electronic systems market, a significant portion of near-term demand is tied to replenishment. Munitions, seekers, sensors, and electronic warfare systems have been depleted across multiple conflicts & will require sustained restocking, creating a durable source of demand. **4) Drones - A Structural Growth Category.** Conflict in Ukraine has reshaped military doctrine around attritable, software-defined, mass-producible systems. Drones and loitering munitions are functioning as both platforms and consumables, creating a powerful combination of unit growth and recurring replenishment. Recent policy initiatives, including the Executive Order on Unleashing American Drone Dominance and other domestic sourcing efforts, are providing further strength.

**** We are hosting our Defense Tech Conference on June 25th in NYC. Contact Us for Details. ****

Sizing Up the ~\$965B CY30 TAM: We estimate the addressable defense technology market will grow at a ~7% CAGR from ~\$685B in CY25 to ~\$965B in CY30. We took a bottoms-up approach to size the market across five key segments: platforms, weapons, electronics, space, and software. By segment, we see Platform Systems currently as the largest pool at ~\$290B (~5% CAGR), followed by Electronic Systems at ~\$125B (~5.5%), Space Systems at ~\$110B (~9%), Weapon Systems at ~\$100B (~6.5%), and Software at ~\$60B (~16%). We see the hardware-heavy segments accounting for the bulk of the dollars today, but their share of growth is shrinking as software and space scale. Software is the standout with the segment expected to grow at a ~16% CAGR, driven by command and control, cyber, and AI moving to the center of operations, while space is compounding at ~9% CAGR on proliferated low-earth-orbit constellations, space-based ISR, and a step-up in missile defense. Together they are the two fastest-growing segments and the clearest beneficiaries of new program dollars, even as a cohort of new disruptors are compounding revenue well above 20% and taking share from incumbents.

Please see the analyst certification and important disclosures on page 43 of this report. Evercore ISI and affiliates do and seek to do business with companies covered in its research reports. Investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

© 2026. Evercore Group L.L.C. All rights reserved.

Demand Is at Multi-Decade Highs: Record budgets and rising, bipartisan support are underwriting durable, multi-year demand across the entire defense technology stack. Global military spending reached a record ~\$2.9T in 2025, and the US national defense budget is crossing ~\$1T for the first time, with the FY26 request including ~\$13.4B for AI and autonomy. Demand is broad-based rather than tied to any single crisis, as threats have multiplied across the globe. Simultaneously, European spending is on track to grow nearly 3x through 2030 to become one of the fastest-growing regions. We view this synchronized, allied build-out as a second engine of growth that broadens the customer base well beyond the Pentagon, and we expect the topline to stay elevated through budget cycles and across administrations.

Space Is the Fastest Growing Hardware: We see space as the fastest-growing hardware segment and expected to grow at a ~9% CAGR driven by proliferated low-earth-orbit constellations, space-based ISR, and a step-up in missile-defense demand. Space is now treated as a contested warfighting domain, and Golden Dome for America, which the CBO has pegged as high as ~\$1.2T over 20 years, could anchor multi-year, bipartisan budget growth across satellites, sensing, and interceptors. Falling launch costs and higher cadence are unlocking faster, cheaper constellation deployment, while distributed architectures, on-orbit servicing, and space domain awareness harden assets against a growing set of counterspace threats. We expect the program to touch nearly every layer of the stack, from sensors and tracking to fire-control software and new interceptor production, and to pull a widening set of new entrants into the domain.

Neoprimes Are Outgrowing the Market: A new class of Neoprimes are outpacing the overall market, with high-growth names compounding revenue at very high double digits if not triple digits, far above the mid-to-high-single-digit pace of established counterparts. These Neoprimes are taking share from legacy primes by concentrating in the fastest-moving niches, from autonomy and space to software and munitions, and by building software-defined, scalable hardware. We see the broader defense tech market expanding steadily in the high single digits but see the newest entrants capturing an outsized slice. We think that one of the more durable stories is capability, as these entrants are pushing autonomy, software, and rapid iteration to the center of modern systems and increasingly setting the pace the rest of the industry has to match.

Catalysts Are Aligning: We see multiple catalysts converging at once, which is why we view the current momentum as a durable cycle rather than a one-time spike. Acquisition reform, led by the Executive Order on Modernizing Defense Acquisitions and a Department of War overhaul, is pushing the Pentagon to buy at historic speeds and is lowering the barrier for non-traditional vendors. Record AI and autonomy budgets and new program lines such as Golden Dome and Unleashing American Drone Dominance are unlocking demand for emerging players and legacy primes alike. Finally, a reopened IPO window across 2025 and 2026, with names such as Karman, Voyager, AIRO, Firefly, and Swarmer, is validating the model in the public market at premium multiples. We think these forces are amplifying one another and resetting who captures the next decade of defense spend.

Electronics Replenishment Is the Quiet Engine: Inside the ~\$125B Electronic Systems pool, a large and underappreciated share of near-term dollars is non-discretionary replenishment that includes restocking the installed base of munitions, seekers, sensors, and electronic-warfare (EW) gear drawn down across Ukraine, the Red Sea, and Iran strikes. Congress has steered >\$30B into munitions stockpiles and industrial-base expansion, and CSIS estimates it will take roughly three-plus years to rebuild key interceptor and air-defense stocks. Critically, the refill is electronics-rich: every interceptor, loitering munition, and counter-UAS effector carries seekers, RF/EW components, processors, and guidance, so the restock cycle disproportionately favors merchant-electronics and subsystem suppliers. Install-base replenishment is a multi-year, budget-protected annuity that converts to revenue faster than new platform starts.

Drones Are the Sharpest Edge of the Cycle: FY26 carries the Pentagon's first stand-alone autonomy line at \$13.4B, alongside \$9.4B for unmanned and remotely-operated aircraft and \$3.1B for counter-UAS across the services. The global military-drone market (~\$20B in 2023) is compounding ~12% a year, while the counter-UAS market is compounding ~25% toward ~\$18B by 2035. Ukraine has reset doctrine toward attritable, software-defined, mass-producible systems — Drones and loitering munitions consumed and replaced at industrial scale, which makes drones a platform and consumable. That pairing of high unit growth with a recurring replenishment tail, plus the Executive Order on Unleashing American Drone Dominance and a domestic-sourcing push, widens the moat for U.S. primes and Neoprimes alike.

2026 The Future of Defense Tech Conference Schedule

Conference Overview

Logistics

- Attendees: Attendees across public investors, VC/PEs, strategics, and emerging defense tech companies
- Location: Evercore office (44th floor, 55 East 52nd St, New York, NY)

Conference Schedule

- 8:30am: Registration & Breakfast
- 9:15-9:40am: Welcome Remarks
- 9:45-10:15am:
 - ▶ Panel #1: Why the Defense Revolution is Here to Stay
- 10:30-11:45am: 1x1 / Group Meetings
- 12:00-1:00pm:
 - ▶ Lunch: Conversation on Global Conflict and Competition
- 1:15-2:30pm: 1x1 / Group Meetings
- 2:35-3:00pm:
 - ▶ Panel #2: Evercore ISI Defense Tech Perspectives
- 3:15-5:10pm: 1x1 / Group Meetings
- 5:15-6:00pm: Cocktail Reception

Executive Summary – Defense Tech

- **~\$965B Defense Tech CY30 TAM:** We size the addressable defense technology market at ~\$685B in CY25, growing at a ~7% CAGR to ~\$965B by CY30E across five key segments: platforms, weapons, electronics, space, and software.
- **Demand Is at Multi-Decade Highs:** Global military spending has reached a record ~\$2.9T, and US procurement and research budgets are inflecting higher as threats intensify across multiple theaters at once. That rising, bipartisan budget base underwrites durable, multi-year demand across the entire defense technology stack.
- **Space Is the Fastest Hardware:** Space is the fastest-growing hardware segment and is expected to grow at a ~9% CAGR, driven by proliferated low-earth-orbit constellations, space-based ISR, and a step-up in missile-defense demand. Golden Dome alone could anchor multi-year, bipartisan budget growth, cementing space as a contested warfighting domain.
- **Neoprimes Are Outgrowing the Market:** A new class of Neoprimes is outgrowing the overall market, with high-growth names compounding revenue >20%, far above the mid-to-high-single-digit market. They are taking share from legacy primes by concentrating in the fastest-moving niches.
- **Catalysts Are Aligning:** Multiple catalysts are aligning at once, as acquisition reform lets the Pentagon buy at startup speed, record AI and autonomy budgets unlock demand, and a reopened IPO window across 2025 and 2026 validates the cycle at premium multiples. Together they point to a durable, multi-year cycle rather than a one-time spike.

Sizing Up The Defense Tech Market

EVERCORE ISI

Evercore ISI Research

Sizing Up – Growing Defense Tech TAM

Overview

- **Defense Tech TAM CY30 ~\$965B:** We size the addressable defense technology market at ~\$685B in CY25, reaching ~\$965B by CY30E (~7% CAGR). Our framework counts equipment, space, and software. We have anchored the result to procurement, research, and software spend rather than headcount-driven operating budgets.
- **Platform Systems Lead the Pool:** We see platforms as the largest segment at ~\$290B, spanning aircraft, maritime, ground vehicles, and unmanned systems, followed by Electronic (~\$125B), Space (~\$110B), Weapons (~\$100B), and Software (~\$60B). The hardware-heavy segments still account for the bulk of the dollars today, but their share of growth is shrinking as software and space scale.
- **Software and Space Drive the Growth:** Software compounds ~16% as command and control, cyber, and AI move to the center of the operations and decision speed becomes the differentiator. Space growing ~9% on proliferated low-earth-orbit constellations, space-based ISR, and a step-up in missile-defense demand. Together they are the two fastest-growing segments and the clearest beneficiaries of new program dollars.
- **Disruptors Outpace the Market:** A cohort of high-growth, venture-backed entrants is compounding revenue well above 20%, far faster than the mid-to-high-single-digit market, by concentrating in the fastest niches and taking share from incumbents. This is the gap between company growth and market growth: the pie is expanding steadily, but the newest players are capturing an outsized slice.

Evercore ISI Research

Sizing Up – Platform Systems (~\$290B TAM)

- **\$290B TAM:** ~\$290B in CY25, growing to ~\$370B by CY30E (~5% CAGR) as aging fleets recapitalize, allied demand rises, and unmanned systems scale across every domain.
- **Key Use Cases:** Force projection, ISR, precision strike, airlift and sealift, and contested logistics, moving personnel, equipment, and firepower into and across the operational area by air, land, and sea.
- **Main Verticals:** Military aircraft and rotorcraft, crewed and uncrewed maritime vessels, armored ground vehicles, and a fast-growing layer of unmanned aerial and ground systems.
- **Why It Matters:** Platforms are the largest pool of defense capital and the integration point for weapons, sensors, and autonomy, the foundation on which every other segment is fielded.

Platform Systems TAM Opportunity

Platform Systems Companies

GENERAL DYNAMICS

Source: Fortune Business Insights, CBO, Evercore ISI Research

Evercore ISI Research

Sizing Up – Platform Systems (~\$290B TAM)

Platform Systems — Where the Dollars Sit

- **Military Aircraft and Rotorcraft Anchor the Pool.** Combat aircraft, transports, tankers, and helicopters lead recapitalization; the military helicopter market alone is ~\$36B in CY25, and fifth and sixth-generation fighter programs extend the cycle into the 2030s.
- **Maritime Systems Are Scaling.** Surface combatants and submarines are being joined by a fast-growing layer of autonomous surface and undersea vessels that extend sea-based reach at a fraction of legacy cost.
- **Ground Vehicles Are Modernizing.** Armored fighting vehicles, tactical trucks, and unmanned ground systems are being upgraded for survivability, electrification, and crewed-uncrewed teaming.
- **Unmanned Is the Fastest Mover.** Military drones are ~\$47B and compounding double digits as attritable air autonomy scales; group 1-3 UAS and loitering munitions have proliferated since Ukraine.
- **Value Is Shifting to Software.** Platforms are increasingly defined by the sensors, autonomy, and mission software they carry, pushing the pool toward software-defined, upgradeable architectures.

Platform Systems Segment CY25 TAMs

Source: Fortune Business Insights, CBO, Evercore ISI Research

Evercore ISI Research

Sizing Up – Weapon Systems (~\$100B TAM)

- **\$100B TAM:** ~\$100B in CY25, growing to ~\$137B by CY30E (~6.5% CAGR) as missile inventories rebuild, munitions production scales, and directed energy moves toward fielding.
- **Key Use Cases:** Precision strike, close combat, counter-UAS, and magazine-depth replenishment, with emerging directed-energy systems extending affordable counter-air and counter-rocket defense.
- **Main Verticals:** Missiles and guided munitions, conventional ammunition and small arms, and an emerging directed-energy layer of lasers and high-power microwave systems.
- **Why It Matters:** Munitions are the most consumable layer of defense, driving recurring, high-volume demand and a structural restock cycle. Missile defense is captured separately under Space Systems.

Weapon Systems TAM Opportunity

Weapon Systems Companies

GENERAL DYNAMICS

Source: MarketsandMarkets, Grand View Research, Evercore ISI Research

Evercore ISI Research

Sizing Up – Weapon Systems (~\$100B TAM)

Weapon Systems — Where the Dollars Sit

- **Missiles and Guided Munitions Lead.** Precision strike, loitering munitions, and emerging hypersonics drive recurring, high-volume demand, while missile-defense interceptors are captured separately under Space Systems.
- **Munitions Restock Is Structural.** Conventional ammunition and small arms are being replenished at scale after sustained drawdowns, with multi-year procurement commitments to rebuild magazine depth across the alliance.
- **Production Capacity Is the Constraint.** The Pentagon and allies are funding new lines and second sources to lift output of artillery, rockets, and guided weapons, the binding limit on near-term supply.
- **Directed Energy Is Emerging.** Lasers and high-power microwave systems are a ~\$6-8B market today, compounding at high-teens rates as cost-per-shot economics improve against drones, rockets, and mortars.
- **New Entrants Are Scaling.** A wave of non-traditional producers is bringing affordable, mass-producible strike weapons and propulsion to the magazine, challenging the incumbents on price and speed.

Weapon Systems Segment CY25 TAMs

Source: MarketsandMarkets, Grand View Research, Evercore ISI Research

Evercore ISI Research

Sizing Up – Electronic Systems (~\$125B TAM)

- **\$125B TAM:** ~\$125B in CY25, growing to ~\$163B by CY30E (~5.5% CAGR) as sensing, secure networking, and electronic attack proliferate across every platform.
- **Key Use Cases:** Situational awareness, secure communications, electronic attack and protect, assured navigation, and precision targeting across contested, congested electromagnetic environments.
- **Main Verticals:** Radar and sensors, secure military communications, electronic warfare, and resilient navigation and guidance systems that anchor every kill chain.
- **Why It Matters:** Electronics are the nervous system of every platform and weapon, and spectrum dominance is now decisive, lifting electronic content faster than platform unit volumes.

Electronic Systems TAM Opportunity

Electronic Systems Companies

Source: Mordor Intelligence, Evercore ISI Research

Evercore ISI Research

Sizing Up – Electronic Systems (~\$125B TAM)

Electronic Systems — Where the Dollars Sit

- **Radar and Sensors Are the Anchor.** Ground, airborne, naval, and space-cued radar plus EO/IR sensing form the largest electronics pool and the front end of every modern kill chain.
- **Communications Are Being Hardened.** Secure SATCOM, tactical radio, and resilient, low-latency datalinks underpin multi-domain operations and joint all-domain command and control across contested theaters.
- **Electronic Warfare Is Prioritized.** EW and electronic attack are set to grow toward ~\$24B by 2030 as spectrum dominance becomes decisive and adversary jamming and spoofing proliferate.
- **Navigation Is Being Made Resilient.** Assured positioning, navigation, and timing is a fast-growing focus as GPS denial spreads, driving demand for alternative and anti-jam guidance.
- **Content per Platform Is Rising.** Every new aircraft, ship, and vehicle carries more sensing, processing, and EW content, lifting electronics value faster than platform unit volumes.

Electronic Systems Segment CY25 TAMs

Source: Mordor Intelligence, Evercore ISI Research

Evercore ISI Research

The Install-Base Restock Cycle

Overview

- **Demand Pull:** Ukraine, the Red Sea, and the June 2026 Iran strikes drew down interceptor, air-defense, and munitions stocks.
- **Budget Response:** Congress directed >\$30B to munitions stockpiles and industrial-base expansion, and suppliers are scaling capacity.
- **The Constraint:** CSIS estimates 3+ years to rebuild key stocks, with solid rocket motors, seekers, and advanced chips the bottlenecks.
- **Read-Through:** A multi-year, recurring annuity for electronics suppliers, with DRS and Kratos capex both up ~64% y/y signaling the ramp.

FY25 Supplier CapEx (\$M)

Capacity Investment Ramping

Public-Company Read – Defense Electronics

Company (Ticker)	FY25 Rev	YoY	EBITDA	Electronics read-through
Leonardo DRS (DRS)	\$3,648M	+12.8%	\$443M	Sensors, EW, network computing; capex +64% for capacity
Kratos (KTOS)	\$1,347M	+18.5%	\$75M	Microwave & rocket systems feeding missiles/loitering munitions
Mercury Systems (MRCY)*	\$912M	+9.2%	\$72M	RF/processing subsystems into radar, EW, missiles; turnaround
Karman (KRMN)	\$472M	+36.6%	\$116M	Missile/hypersonic & space structures; direct restock leverage

Source: FactSet, Company Filings, Evercore ISI Research. *MRCY FY ends June.

Evercore ISI Research

Sizing Up – Space Systems (~\$110B TAM)

- **\$110B TAM:** ~\$110B in CY25, growing to ~\$169B by CY30E (~9% CAGR), the fastest-growing hardware segment on proliferated constellations and rising missile-defense demand.
- **Key Use Cases:** Secure SATCOM, space-based ISR, missile warning and defense, and resilient positioning, navigation, and timing that hold up under jamming and counterspace threats.
- **Main Verticals:** Military satellites and ISR, missile-defense systems and interceptors, and the launch services that deploy and replenish constellations on orbit.
- **Why It Matters:** Space is now a contested warfighting domain, and Golden Dome puts missile defense at the center of demand, anchoring multi-year, bipartisan budget growth.

Space Systems TAM Opportunity

Space Systems Companies

Source: GM Insights, CBO, Evercore ISI Research

Evercore ISI Research

Sizing Up – Space Systems (~\$110B TAM)

Space Systems — Where the Dollars Sit

- **Satellites and ISR Are Inflecting.** Proliferated low-earth-orbit constellations and synthetic-aperture radar are reshaping persistent, all-weather surveillance and tactical targeting at lower cost.
- **Missile Defense Is the Swing Factor.** Golden Dome could run as high as ~\$1.2T over 20 years, with integrated air and missile defense alone scaling from ~\$38B to ~\$68B by 2030.
- **Launch Is the Enabler.** Falling launch costs and higher cadence are unlocking faster, cheaper constellation deployment and the responsive space access that modern operations require.
- **Resilience Is the New Priority.** Distributed architectures, on-orbit servicing, and space domain awareness are hardening assets against a growing set of counterspace threats.
- **Demand Is Structural and Bipartisan.** Space is now treated as a contested warfighting domain, anchoring multi-year budget growth across communications, ISR, and missile defense.

Space Systems Segment CY25 TAMs

Source: GM Insights, CBO, Evercore ISI Research

Evercore ISI Research

Sizing Up – Software (~\$60B TAM)

- **\$60B TAM:** ~\$60B in CY25, growing to ~\$126B by CY30E (~16% CAGR), the fastest-growing layer of defense and the core of the defense-tech thesis as autonomy and data move to the center of the fight.
- **Key Use Cases:** Mission planning and command & control, cyber defense, AI-enabled decision support, and cross-domain data fusion that compress the time from sensing to action.
- **Main Verticals:** Defense software and command & control, cybersecurity and network defense, and the data analytics and AI that turn sensor feeds into decisions.
- **Why It Matters:** Software is where decision speed, autonomy, and the modern kill chain are won, and it carries the highest margins and most recurring, subscription-like revenue in defense.

Software TAM Opportunity

Software Companies

Booz | Allen | Hamilton

Source: GM Insights, Fortune Business Insights, Evercore ISI Research

Evercore ISI Research

Sizing Up – Software (~\$60B TAM)

Software — Where the Dollars Sit

- **Software Is the Fastest Layer.** Mission command and control, planning, and analytics compound ~16% as the kill chain digitizes and decision speed becomes the primary differentiator.
- **Cyber Is a Structural Spend.** Defense cybersecurity is ~\$27B and growing steadily as networks, weapons, and supply chains are hardened against persistent nation-state threats.
- **AI Is the Accelerant.** The Department of Defense requested ~\$13.4B for AI and autonomy in FY26, its largest-ever single-year AI investment, pulling frontier models into the mission.
- **Delivery Is Being Rewired.** New software platforms are compressing the path to accredit and field commercial code inside government environments, cutting timelines from years to months.
- **Recurring and High-Margin.** Software shifts defense toward subscription and platform economics, the most scalable and highest-margin layer of the entire stack.

Software Segment CY25 TAMs

Source: GM Insights, Fortune Business Insights, Evercore ISI Research

Evercore ISI Research

Sizing Up – Drones & Counter-UAS

Overview

- **Market Size:** The global military-drone market (~\$20B in 2023) is compounding ~12% a year toward ~\$45B by 2030E.
- **Doctrine Shift:** Ukraine has reset demand toward attritable, software-defined, mass-producible systems, with FPV drones and loitering munitions used and replaced at scale.
- **Platform + Consumable:** Drones pair high unit growth with a recurring replenishment tail, unlike traditional platforms.
- **Read-Through:** U.S. primes and Neoprimes (AeroVironment, Kratos, Red Cat, and Ondas) are the most direct beneficiaries.

Military Drone Market (\$B)

Drone Ecosystem Companies

Evercore ISI Research

FY26 Budget – Autonomy & Counter-UAS

Overview

- **First Autonomy Line:** FY26 carries the Pentagon's first stand-alone autonomy line at \$13.4B, plus \$9.4B for unmanned aircraft.
- **Counter-UAS Surge:** \$3.1B requested for counter-UAS across the services, with the C-UAS market compounding ~25% toward ~\$18B by 2035E.
- **Cost-Exchange Problem:** Cheap drones versus expensive interceptors is driving demand for affordable effectors and directed energy.
- **Read-Through:** Policy (the Unleashing American Drone Dominance EO) plus budget widens the moat for domestic suppliers.

Counter-UAS Market (\$B)

Counter-UAS Players

Tailwinds Behind Defense Tech

EVERCORE ISI

Evercore ISI Research

Defense Tech Market – “TOP 5” Industry Tailwinds

Procurement Modernization	Acquisition reform and the Department of War overhaul are pushing the Pentagon to buy at startup speed. The Executive Order on Modernizing Defense Acquisitions prioritizes speed and outcomes over process, while moves to rebuild the defense industrial base, empower acquisition teams, and slash regulatory red tape lower the barrier for new entrants. Together they signal a structural shift in how capability gets funded and fielded.
Silicon Valley's Growing Defense Relationship	Silicon Valley's relationship with defense has fundamentally shifted, with AI leaders now recognizing that AI leadership and national security are inseparable. As new budgets are unlocked, frontier labs are prioritizing national security as a target vertical. OpenAI and Anthropic each secured major defense contracts in 2025 and now offer dedicated, hardened products for federal stakeholders.
New Programs Are Spurring Innovation	New programs are spurring rapid innovation and coordination across the sector. Initiatives announced in 2025, including the Executive Order on Unleashing American Drone Dominance and Golden Dome for America, are opening large, multi-year program lines. The opportunity extends to startups and legacy primes alike, anchoring durable demand across drones, autonomy, and missile defense.
Geopolitics is Globalizing Demand	Geopolitical tensions have increased interest in defense innovation worldwide. European defense spending is projected to grow nearly 3x through 2030, making defense one of the region's fastest-growing sectors. Flashpoints continue to multiply across the Middle East, the Taiwan Strait, Venezuela, and even the Arctic, broadening demand well beyond the United States.
Capital Markets Are Validating the Sector	Capital markets are validating defense innovation at unprecedented multiples. Defense pulled ahead of the broader market in 2025, with high-growth names driving much of the outperformance, and IPOs from Karman, AIRO, Firefly, and Voyager underscored rising investor demand. With Palantir near ~65x NTM revenue, roughly 10x the EMCLOUD median, the market has confirmed that Neoprimes can scale alongside legacy primes.

Tailwind #1 – Procurement Modernization

Reform in Motion

- **Reform Is Reordering How the Pentagon Buys.** The Executive Order on Modernizing Defense Acquisitions and the Department of War overhaul continue to push speed and outcomes ahead of process, signaling that the Pentagon is serious about buying at startup speed and treating rapid fielding as the default.
- **The Industrial Base Is Being Rebuilt.** Reshoring, second sources, and surge capacity are being funded to cut single points of failure across the supply chain, as policymakers increasingly treat industrial capacity as a strategic asset in its own right.
- **Acquisition Teams Are Empowered.** Program offices can now field capability faster, with expanded use of other-transaction agreements and commercial pathways that move technology from prototype to program of record far quicker and remove much of the friction that kept startups on the sidelines.
- **Funding Is Getting More Flexible.** Multi-year and portfolio funding are reducing the start-stop risk that has long deterred new entrants, giving vendors the budget visibility to invest ahead of demand and scale what works.
- **Why It Matters.** A lower barrier for non-traditional vendors lets emerging players win and scale programs once reserved for legacy primes, the single biggest structural unlock for defense tech and a reshaping of who captures the next decade of spend.

Acquisition Reform Timeline

Date	Reform Action
Apr 2025	EO: Modernizing Defense Acquisitions
Jun 2025	EO: Unleashing American Drone Dominance
Nov 2025	DoW Warfighting Acquisition System

Source: The White House, Department of War, Bessemer Venture Partners, Evercore ISI Research

Evercore ISI Research

Tailwind #2 – Silicon Valley's Growing Defense Relationship

The Numbers Behind the Shift

- **Silicon Valley's Posture Has Flipped.** AI leaders now treat national security as a core vertical rather than a reputational risk, recognizing that AI leadership and national security have become inseparable after years of technologists keeping their distance.
- **Frontier Labs Are Under Contract.** Leading AI labs now hold \$200M Department of Defense prototype agreements and ship dedicated, hardened products for government, moving well beyond pilots into mission-critical national security settings.
- **AI Is the Top Budget Priority.** The Department of Defense's ~\$13.4B FY26 AI and autonomy request stands as its largest-ever single-year AI investment, marking a shift from research and demonstration toward fielding AI at scale across the force.
- **Dual-Use Is the Model.** Commercial AI advances now reach the warfighter far faster than traditional program timelines allow, letting the department adopt best-in-class capability as it matures and giving the US a structural edge if it integrates quickly.
- **Talent Follows the Mission.** Engineers once hesitant to work in defense are increasingly joining mission-focused AI teams, deepening the talent pool exactly as budgets and urgency rise and creating a virtuous cycle of talent and capital.

DoD CDAO Frontier-AI Awards (2025, \$M ceiling)

Source: U.S. DoD CDAO, Anthropic, DefenseScoop, Evercore ISI Research

Tailwind #3 – New Programs Are Spurring Innovation

Two Flagship Catalysts

- **New Programs Are Spurring Demand.** Flagship initiatives are opening large, multi-year program lines for emerging players and primes alike, each establishing requirements, budgets, and acquisition vehicles that startups can compete for directly.
- **Golden Dome for America.** The layered homeland missile-defense effort could run as high as ~\$1.2T over 20 years, anchoring durable demand across interceptors, space-based sensing, and command and control, and touching nearly every segment of defense tech.
- **Unleashing American Drone Dominance.** The drone executive order is accelerating domestic production, procurement, and integration at scale, aiming to rebuild a US drone supply base and match the mass and pace of drone warfare seen in recent conflicts.
- **Primes and Startups Both Win.** New programs create pull for legacy integrators and emerging autonomy and space players at the same time, widening the opportunity, with many programs now structured to combine prime-scale integration and startup speed.
- **Durable, Bipartisan Support.** Homeland defense and drones enjoy broad political backing, extending the demand runway well past this budget cycle and insulating these priorities from the swings that have disrupted other defense programs.

Golden Dome Cost Estimates (\$B)

Source: CBO, The White House, Bessemer Venture Partners, Evercore ISI Research

Tailwind #4 – Geopolitics is Globalizing Demand

A Worldwide Build-Out

- **Geopolitics Is Globalizing Demand.** Rising tensions are lifting defense innovation and budgets well beyond the United States, turning allied rearmament into a second engine of growth as multiple regions raise spending at once.
- **Europe Is Rearming.** European defense spending is on track to grow nearly 3x through 2030, making defense one of the region's fastest-growing sectors and a major new pool of demand as governments prioritize sovereign capability.
- **Flashpoints Keep Multiplying.** The Middle East, the Taiwan Strait, Venezuela, and the Arctic are all driving sustained, simultaneous demand, keeping spending elevated across multiple theaters rather than tied to any single crisis.
- **Capital Is Following.** European defense startups have raised more than EUR2.4B and minted multiple new unicorns, with funding still accelerating as investors follow the budgets into a structurally larger market.
- **A Synchronized Cycle.** Allied rearmament broadens the addressable market and lengthens the runway for the entire sector, supporting a multi-year build-out that is less dependent on any single budget or political outcome.

European Defense Spend (Indexed)

Source: Bessemer Venture Partners, IISS, Evercore ISI Research

Evercore ISI Research

Tailwind #5 – Capital Markets Are Validating the Sector

Validation in the Tape

- **Capital Markets Are Validating the Sector.** Public markets continue to reward defense innovation at unprecedented multiples, paying up not just for current growth but for the visibility that long-dated government demand provides.
- **Defense Keeps Ahead of the Market.** Aerospace, defense, and industrials led the tape in 2025 and have carried that momentum forward, with high-growth names driving a disproportionate share of the gains and pulling in generalist investors.
- **The IPO Window Has Reopened.** A wave of defense names has come public, with a deep pipeline still waiting behind them, and strong debuts are encouraging more private companies to file.
- **Premium Multiples Persist.** The highest-growth software names still command revenue multiples far above the broader software cohort, reflecting rapid growth and the stickiness of mission-critical government demand.
- **Disruptors Are Compounding.** A cohort of high-growth entrants is growing revenue well above 20%, taking share from legacy primes and proving new players can build durable, scalable businesses alongside the incumbents.

Defense Tech IPOs

Company	Date	Size
Karman Holdings (KRMN)	Feb 2025	~\$506M
Voyager Technologies (VOYG)	Jun 2025	~\$440M
AIRO Group (AIRO)	Jun 2025	~\$70M
Firefly Aerospace (FLY)	Aug 2025	~\$870M
Swarmr (SWMR)	Mar 2026	~\$15M

2026 The Future of Defense Tech Conference Schedule

Conference Overview

Logistics

- Attendees: Attendees across public investors, VC/PEs, strategics, and emerging defense tech companies
- Location: Evercore office (44th floor, 55 East 52nd St, New York, NY)

Conference Schedule

- 8:30am: Registration & Breakfast
- 9:15-9:40am: Welcome Remarks
- 9:45-10:15am:
 - ▶ Panel #1: Why the Defense Revolution is Here to Stay
- 10:30-11:45am: 1x1 / Group Meetings
- 12:00-1:00pm:
 - ▶ Lunch: Conversation on Global Conflict and Competition
- 1:15-2:30pm: 1x1 / Group Meetings
- 2:35-3:00pm:
 - ▶ Panel #2: Evercore ISI Defense Tech Perspectives
- 3:15-5:10pm: 1x1 / Group Meetings
- 5:15-6:00pm: Cocktail Reception

2026 The Future of Defense Tech Conference Schedule

COMPANY ATTENDEES			
COMPANY	ATTENDEE(S)	COMPANY	ATTENDEE(S)
 ANDURIL	Adam Porter-Price (VP, Head of Corporate Development)	 SHIELD AI	Brian Hamilton (VP, Corporate Development) Henoch Senbetta (Chief of Staff) Dylan Keefe (Director, Corporate Development)
 AIR formerly Govini	Amir Hegazy (Chief Strategy Officer)	 SKYRYSE	Mark Groden (Founder & CEO) Chad McCallister (Investor Relations & Strategic Finance Lead)
 Onebrief	Grant Demaree (Co-Founder & CEO) Adam Lackey (COO)	 True Anomaly	Even Rogers (Co-Founder & CEO) Mark Seidel (CFO)
 SARONIC	Patrick DePriest (CFO)	 URSA MAJOR FLY FASTER	Chris Spagnoletti (CEO) Nick Doucette (VP, Strategic Operations)
 Second Front	Tyler Sweatt (CEO) Sam Gray (EVP, Market Development) Dan Calbi (Chief of Staff)	 X-BOW	Jason Hundley (Co-Founder & CEO) Maureen Gannon (Co-Founder & Chief Growth Officer) Joe Pignato (CFO)

Select Key Investors

- **\$5.0B Series H (May 2026)**
 - ▶ Led by Thrive Capital & Andreessen Horowitz
- **\$2.5B Series G (June 2025)**
 - ▶ Led by Founders Fund

~\$11.9B

Raised to date as of May 2026

Company Description

- Anduril Industries is a defense technology company building AI-enabled autonomous systems with a focus on replacing legacy defense primes with software-defined, scalable hardware platforms.
- Customers include the US DoW (all service branches) and DHS/CBP, plus allied militaries such as the UK and Australia.
- Key Products:
 - ▶ **Software / Autonomy** (Lattice): AI-powered command-and-control platform.
 - ▶ **Autonomous Air Systems** (Ghost, Altius, Anvil, Roadrunner): ISR drones, loitering munitions, and interceptor UAVs.
 - ▶ **Strike Systems** (Barracuda): Low-cost, mass-producible cruise missiles.
 - ▶ **Surveillance & Maritime Systems** (Sentry Towers, Dive-LD, Ghost Shark): Fixed sensor networks and autonomous underwater vehicles.
- Anduril Industries was founded in 2017, with headquarters in Costa Mesa, CA, and has ~7,000 employees.

Attendee

Adam Porter-Price
VP, Head of Corporate Development

- Joined in 2022 and Board member of **Silicon Valley Defense Group**, previously VP of Corporate Development at **SAIC**
- MBA from London Business School, B.A. from University of Connecticut.

Source: Company website and press releases, Pitchbook

Evercore ISI Research

Select Key Investors

- **\$150M Growth Round (October 2025)**
 - ▶ Led by Bain Capital
- **\$20M Series C (June 2025)**
 - ▶ Investors include Accel Partners and Salesforce Ventures

~\$175M

Raised to date as of October 2025

Company Description

- Air is the leader in Enterprise Readiness. Our mission is to establish readiness as a real-time condition, continuously aligning development, production, delivery, and sustainment into one coordinated execution system for government agencies and industrial suppliers.
- Customers include the US DoW (Army and OSD/WHS) and DHS/Coast Guard.
- Key Products:
 - ▶ **Activation** brings together commercial, supplier, enterprise, and operational data into the Readiness Graph so teams can understand demand, capacity, risk, and execution status.
 - ▶ **Orchestration** helps teams identify issues, prioritize what matters, evaluate trade-offs across cost, schedule, performance, and risk, and coordinate people, resources, and workflows.
 - ▶ **Execution** turns decisions into coordinated follow-through across the mission workflows.
- Air (formally Govini) was founded in 2011, with headquarters in Arlington, VA, and has ~300 employees.

Attendee

Amir Hegazy Chief Strategy Officer

- Joined in 2024, previously served as Managing Director at **Berenson & Company**, a merchant bank, focused on software and technology-enabled services.
- Additionally, Amir was a senior member of **Berenson Capital** (the firm's investment arm) and served on the board of **Skience** from 2018–2024.
- Holds a B.A. in Finance and a minor in Economics from Pace University.

Evercore ISI Research

Onebrief

Select Key Investors

- **\$200M Series D (January 2026)**
 - ▶ Co-led by Battery Ventures and Sapphire Ventures
- **\$50M Series C (February 2025)**
 - ▶ Led by Battery Ventures

~\$486M

Raised to date as of February 2026

Company Description

- Onebrief is a developer of a cloud-based operational planning platform for the military, enabling real-time, collaborative mission planning and replacing static briefing tools with a shared, continuously updated operational picture.
- Customers include the US Air Force (Air Combat Command) and DoW planning staffs.
- Key Product:
 - ▶ **Command Operating System** (Onebrief Platform): Cloud-based software platform that enables military staffs to plan, collaborate, and execute operations in real time, replacing static briefing tools (e.g., PowerPoint) with a shared, live operation picture.
 - ▶ Key Features:
 - ▶ **Collaborative Planning:** Enables distributed teams to build and update operational plans simultaneously with a synchronized, real-time view.
 - ▶ **AI-Enabled Workflows:** Automates elements of planning and briefing, turning static outputs into continuously updated, data-driven plans.
- Onebrief was founded in 2019, with headquarters in Honolulu, HI, and has ~200 employees.

Attendees

Grant Demaree – Co-Founder & CEO

- Previously at **Alchemist Accelerator** and **Y Combinator** Portfolio Companies.
- Prior to that, served in the **US military** including the **US Army** and 101st Airborne Division
- Bachelor's Degree from West Point, US Military Academy.

Adam Lackey – COO

- Previously Founder of **PentacleGlobal**, Program Director at **NATO** Joint Warfare Centre Stavanger, and the **US military**.
- MA from King's College London, MA from Eisenhower School for National Security and Resource Strategy, MBA from Webster University.

Source: Company website and press releases, Pitchbook

Evercore ISI Research

Select Key Investors

- **\$1.75B Series D (March 2026)**
 - ▶ Led by Kleiner Perkins
- **\$600M Series C (February 2025)**
 - ▶ Led by Elad Gil

~\$2.6B

Raised to date as of March 2026

Company Description

- Saronic develops autonomous surface vessels (ASVs) and mission software for maritime ISR, logistics, and payload delivery, enabling long-range, coordinated operations across distributed naval systems.
- Customers include the US Navy (Corsair autonomous surface vessels).
- Key Products:
 - ▶ **Autonomous Surface Vessels** (Corsair, Mirage, Marauder): A family of modular autonomous vessels spanning small-to-large platforms, designed for ISR, logistics, and multi-mission maritime operations.
 - ▶ **Autonomy & Control Software** (Echelon): Command-and-Control software for control of autonomous fleets in water.
- Saronic was founded in 2022, with headquarters in Austin, TX, and has ~1,300 employees.

Attendee

Patrick DePriest
CFO

- Over 20 years of experience across corporate finance and high-growth technology companies.
- Previously CFO at **Merlin Labs**.
- MBA from Boston College; B.A. in Economics and M.S. in Accounting from University of Massachusetts Amherst.

Source: Company website and press releases, Pitchbook

Evercore ISI Research

Select Key Investors

- **\$70M Series C (September 2024)**
 - ▶ Led by Salesforce Ventures
- **\$40M Series B (November 2023)**
 - ▶ Led by New Enterprise Associates

~\$150M

Raised to date as of September 2024

Company Description

- Second Front provides a platform that accelerates the deliver of commercial software into government systems by automating security, compliance, and Authority to Operate (ATO) processes across defense cloud environments.
- Customers include the US DoW (Air Force via Game Warden) and NATO.
- Key Products:
 - ▶ **2F Workshop:** Provides DevSecOps tools in an accredited environment so the software is optimized for regulated government networks.
 - ▶ **2F Game Warden:** Enables users to earn accreditation and obtain an authorization to deploy their application on government networks quickly and at low costs.
 - ▶ **2F Frontier:** Extends secure DevSecOps capabilities for drones, devices, vehicles, and other deployment scenarios.
- Second Front was founded in 2014, with headquarters in Wilmington, DE, and has ~170 employees.

Attendees

Tyler Sweatt – CEO

- Joined in 2020 and currently serves as CEO and as Partner at **Silicon Valley Defense Group**.
- Previously, served as a Technical Advisor at **Pallas Advisors**.
- BS in Economics from US Military Academy at West Point.

Sam Gray – EVP, Market Development

- Joined in 2024; previously, served as a Venture Partner at **Franklin Templeton** and in **U.S. Navy** for over 20 years.
- M.A. from U.S. War College and B.A. from Ohio State University.

Dan Calbi – Chief of Staff

- Joined in 2024; Previously at **Goldman Sachs** and Captain in the **U.S. Army**.
- MBA from Columbia Business School and B.S. from University of South Carolina.

Source: Company website and press releases, Pitchbook

Evercore ISI Research

Select Key Investors

- **\$1.5B Series G (March 2026)**
 - ▶ Led by Advent International
- **\$500M Series F (December 2023)**
 - ▶ Led by USIT Fund

~\$3.2B

Raised to date as of March 2026

Company Description

- Shield AI is a defense technology company developing AI-powered autonomy software and unmanned aircraft to enable autonomous operations in denied and contested environments.
- Customers include the US military (incl. the Coast Guard) and allied/international forces.
- Key Offerings:
 - ▶ **Hivemind Enterprise:** Suite of autonomy software (EdgeOS, Pilot, Commander, Forge) enabling AI-piloted operation, mission planning, and deployment of autonomous systems across air and other platforms.
 - ▶ **X-BAT:** AI-piloted, Group 5 VTOL unmanned aircraft designed for runway-independent operations in contested environments, combining long range, autonomy, and multi-mission capability.
 - ▶ **V-BAT:** Group 3 VTOL unmanned aircraft with a ducted-fan design and >12-hour endurance, used for ISR, maritime, and operations in GPS- and communications-denied environments
- Shield AI was founded in 2015, with headquarters in San Diego, CA, and has ~1,300 employees.

Attendees

Brian Hamilton – VP, Corporate Development

- Joined in 2021, previously in investment banking at **Bank of America** and **Guggenheim**. Prior to that, served in the **U.S. Navy**.
- MBA from Indiana University, B.S. from United States Naval Academy.

Henoch Senbetta – Chief of Staff

- Joined in 2021, previously Senior Vice President for M&A at two companies and roles in business development and consulting.
- MBA from Harvard Business School, B.S. in Industrial Engineering from the University of Florida.

Dylan Keefe – Director, Corporate Development

- Joined in 2025, previously in investment banking at **Guggenheim**.
- Bachelor's in Applied Economics and Management, Finance from Cornell University.

Evercore ISI Research

SKYRYSE

Select Key Investors

- **\$300M Series C (February 2026)**
 - ▶ Led by Autopilot Fund and Fidelity Management
- **\$200M Series B (October 2021)**
 - ▶ Co-led by Fidelity Management and Monahsee Investment Management

~\$605M

Raised to date as of January 2026

Company Description

- Skyryse develops a software- and hardware-based flight operating system that replaces cockpit controls with automated, simplified interfaces, enabling safer operation and reducing pilot training requirements.
- Customers include the US Army and US military special operations.
- Key Products:
 - ▶ **SkyOS:** Flight operating system that automates key phases of flight (including takeoff, landing, navigation, and emergency procedures) replacing traditional cockpit complexity with a simplified, software-driven interface.
 - ▶ **Skyryse One:** Helicopter platform fully integrated with SkyOS, featuring fly-by-wire controls, a single control, stick, automated flight capabilities (including automation), and a triple-redundant architecture designed to enhance safety and reduce pilot workload.
- Skyryse was founded in 2016, with headquarters in El Segundo, CA, and has ~200 employees.

Attendees

Mark Groden – Founder & CEO

- Prior to founding, Mark architected a system of unmanned vehicles to combat piracy with the **US Navy**.
- Holds over 60 patents for aerial vehicle automation, safety, and operations.
- Ph.D. in Engineering from Rackham Graduate School, University of Michigan.

Chad McCallister – IR & Strategic Finance Lead

- Joined in 2025, previously at **Houlihan Lokey, KPMG** Corporate Finance, and **Harvey & Company**.
- B.S. in International Business, minor in Applied Mathematics from Pepperdine University.

Source: Company website and press releases, Pitchbook

Evercore ISI Research

True Anomaly

Select Key Investors

- **\$650M Series D (April 2026)**
 - ▶ Led by Eclipse and Riot Ventures
- **\$260M Series C (April 2025)**
 - ▶ Led by Accel

~\$1.0B

Raised to date as of April 2026

Company Description

- True Anomaly is a defense technology company developing spacecraft, software, and mission systems for space superiority and operations in contested orbital environments.
- Customers include the US Space Force (Space Systems Command).
- Key Products:
 - ▶ **Mosaic** (Software Platform): For planning, command-and-control, and autonomous coordination of distributed space assets, enabling real-time sensing, decision-making, and tasking.
 - ▶ **Space-Based Interceptors:** Systems to protect the United States homeland from potential ballistic missile and hypersonic attacks, supporting Golden Dome for America.
 - ▶ **Jackal** (Orbital Spacecraft): Maneuverable spacecraft designed for on-orbit operations in contested environment, supporting a range of payloads and mission profiles.
- True Anomaly was founded in 2022, with headquarters in Denver, CO, and has ~350 employees.

Attendees

Even Rogers – Co-Founder & CEO

- Previously, served as a Fires Officer at **US Space Command**.
- Prior to that, Test Director within the **Space Security and Defense Program**.
- MA from the University of Chicago, BA from Virginia Military Institute.

Mark Seidel – CFO

- Previously, served as the Vice President of Finance & Strategy at **Relativity Space**.
- Prior to that, Corporate Development at **Clutter**, and Investment Banking at **Goldman Sachs**.
- Bachelor's degree in finance from Southern Methodist University.

Source: Company website and press releases, Pitchbook

Evercore ISI Research

Select Key Investors

- **\$100M Series E (November 2025)**
 - ▶ Led by Eclipse Ventures
- **\$138M Series D & D-1 (December 2023)**
 - ▶ Investors include Explorer 1 Fund and Eclipse, RTX Ventures

~\$544M

Raised to date as of November 2025

Company Description

- Ursa Major is a developer of advanced rocket propulsion systems for defense and space applications, including liquid engines for hypersonic and solid rocket motors for missile and launch systems.
- Customers include the US DoW across services, including missile-defense/hypersonics work.
- Key Products:
 - ▶ **Hypersonics & Launch Propulsion** (Hadley and Ripley): Liquid rocket engines enabling high-speed, reusable, and responsive missions.
 - ▶ **In-Space Propulsion:** Propulsion systems for satellites and space mobility, supporting maneuverability and mission flexibility.
 - ▶ **Solid Rocket Motors (SRMs):** Additively manufactured solid motors designed for missile, launch, and defense applications.
- Ursa Major was founded in 2015, with headquarters in Berthoud, CO, and has ~430 employees.

Attendees

Chris Spagnoletti – CEO

- Previously, President of Liquid Systems
- Prior to that, experience includes leadership roles at **US Cargo Systems**.
- BSEE from the University of Vermont.

Nick Doucette – VP, Strategic Operations

- Joined in 2016, previously at SpaceX serving various roles related to propulsion operations and engineering.
- MBA from Indiana University; B.S. in Aerospace Engineering from Boston University.

Source: Company website and press releases, Pitchbook

Evercore ISI Research

Select Key Investors

- **\$105M Series B (May 2025)**
 - ▶ Led by Razor's Edge Ventures
- **\$27M Series A (April 2022)**
 - ▶ Co-led by Crosslink Capital and Razor's Edge Ventures

~\$140M

Raised to date as of November 2025

Company Description

- X-Bow Systems is a non-traditional defense technology company that produces solid rocket motors, offering both traditional SRMs and advanced additive manufacturing solutions.
- In March 2026 acquired Evolution Space to expand its SRM production capacity and hypersonic capabilities.
- Customers include the US DoW, primarily Army and Navy solid rocket motor / hypersonics programs.
- Key Products:
 - ▶ **Additive Manufacturing Platform (AMSP):** Proprietary additive process for solid propellants.
 - ▶ **Solid Rocket Motors (SRMs):** Customizable, high-performance motors for missile, hypersonic, and space launch applications.
 - ▶ **Rocket Factory in a Box:** Modular, deployable manufacturing solution designed to enable distributed, high-throughput SRM production.
 - ▶ **BOLT Test Platforms:** Modular flight vehicles used for rapid testing and validation of propulsion systems.
- X-Bow Systems was founded in 2016, with headquarters in Albuquerque, NM, and has +450 employees.

Attendees

Jason Hundley – Co-Founder & CEO

- Over 20 years of experience in the aerospace industry in executive & engineering roles and is also the founder & CEO of **Zero Point Frontiers**.
- Over 14 years in the **U.S. Armed Services** in both active duty and reserves.
- B.S. from Wright State University, Master's in Mechanical Engineering from George Washington University, and M.S. from Villanova University.

Maureen Gannon – Co-Founder & Chief Growth Officer

- Previously, served as Co-Founder & VP, Business Development at **Firefly Space Systems** and co-founded **Galactic Unite**.
- Industry Council Advisor to **Silicon Valley Defense Group (SVDG)**.
- MIM and B.A. in International Relations & Affairs from University of St. Thomas, coursework in Electrical Engineering at University of California.

Joe Pignato – CFO

- Previously, served as CFO / Investment Team at **Shield Capital**, CEO at **Allied Minds**, and Chairman at **Federated Wireless**.
- B.A. in Financial Economics from Saint Anselm College.

Evercore ISI Research

TIMESTAMP**(Article 3(1)e and Article 7 of MAR)**

Time of dissemination: June 22 2026 6:00 AM ET

ANALYST CERTIFICATION

The analyst, Amit Daryanani, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

IMPORTANT DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and Evercore ISI International Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore"). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: <https://evercoreisi.mediasterling.com/disclosure>.

Evercore and its affiliates, and I or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions**Current Ratings Definition**

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage sector.

In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's coverage sector.

Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's coverage sector.

Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*

Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.

Evercore ISI rating (as of 06/22/2026)

Coverage Universe

Ratings	Count	Pct.
Buy	478	61
Hold	276	35

Issuer-Specific Disclosures (as of June 22, 2026)**Price Charts****GENERAL DISCLOSURES**

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA") and by International Strategy & Investment Group (UK) Limited ("ISI UK"), which is authorized and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore"). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore Inc.

This report is provided for informational purposes only and subject to additional restrictions contained in this disclosure. It is not to be construed as an offer to buy or sell or a solicitation of an offer to buy or sell any financial instruments or to participate in any particular trading strategy in any jurisdiction. The information and opinions in this report were prepared by employees of affiliates of Evercore. The information herein is believed by Evercore ISI to be reliable and has been obtained from public sources believed to be reliable, but Evercore ISI makes no representation as to the accuracy or completeness of such information.

Opinions, estimates and projections in this report constitute the current judgment of the author as of the date of this report. They do not necessarily reflect the opinions of Evercore or its affiliates and are subject to change without notice. In addition, opinions, estimates and projections in this report may differ from or be contrary to those expressed by other business areas or groups of Evercore and its affiliates.

Evercore ISI has no obligation to update, modify or amend this report or to otherwise notify a reader thereof in the event that any matter stated herein, or any opinion, projection, forecast or estimate set forth herein, changes or subsequently becomes inaccurate. Facts and views in Evercore ISI research reports and notes have not been reviewed by, and may not reflect information known to, professionals in other Evercore affiliates or business areas, including investment banking personnel. Evercore ISI salespeople, traders and other professionals may provide oral or written market commentary or trading strategies to our clients that reflect opinions that are contrary to the opinions expressed in this research.

Our asset management affiliates and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

Evercore ISI does not provide individually tailored investment advice in research reports. The financial instruments discussed in this report are not suitable for all investors and investors must make their own investment decisions using their own independent advisors as they believe necessary and based upon their specific financial situations and investment objectives. This report has been prepared without regard to the particular investment strategies or financial, tax or other personal circumstances of the recipient. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to the recipient's individual circumstances, or otherwise constitutes a personal recommendation to the recipient. None of Evercore Group or its affiliates will treat any recipient of this report as its customer by virtue of the recipient having received this report.

Securities and other financial instruments discussed in this report, or recommended or offered by Evercore ISI, are not insured by the Federal Deposit Insurance Corporation and are not deposits of or other obligations of any insured depository institution. If a financial instrument is denominated in a currency other than an investor's currency, a change in exchange rates may adversely affect the price or value of, or the income derived from the financial instrument, and such investor effectively assumes such currency risk. In addition, income from an investment may fluctuate and the price or value of financial instruments described in this report, either directly or indirectly, may rise or fall. Estimates of future performance are based on assumptions that may not be realized. Furthermore, past performance is not necessarily indicative of future performance.

Please note that this report was prepared for and distributed by Evercore ISI to its institutional investor and market professional customers.

Recipients who are not institutional investor or market professional customers of Evercore ISI should seek the advice of their independent financial advisor before considering information in this report in connection with any investment decision, or for a necessary explanation of its contents.

Electronic research is simultaneously distributed to all clients. This report is provided to Evercore ISI clients only and may not be, in whole or in part, or in any form or manner (i) copied, forwarded, distributed, shared, or made available to third parties, including as input to, or in connection with, any artificial intelligence or machine learning model; (ii) modified or otherwise used to create derivative works; or (iv) used to train or otherwise develop a generative artificial intelligence or machine learning model, without the express written consent of Evercore ISI. Receipt and review of this research report constitutes your agreement with the aforementioned limitations in use.

This report is not intended for distribution to or use by any person or entity in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Evercore Group or its affiliates to any registration or licensing requirement within such jurisdiction. If this report is being distributed by a financial institution other than Evercore ISI or its affiliates, that financial institution is solely responsible for such distribution and for compliance with the laws, rules and regulations of any jurisdiction where this report is distributed. Clients of that financial institution should contact that institution to effect any transaction in the securities mentioned in this report or if such clients require further information. This report does not constitute investment advice by Evercore ISI to the clients of the distributing financial institution, and neither Evercore ISI nor its affiliates, nor their respective officers, directors or employees, accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content.

Evercore is not authorized to act as a financial entity, securities intermediary, investment advisor or as any other regulated entity under Mexican law, and no actions, applications or filings have been undertaken in Mexico, whether before the National Banking and Securities Commission (Comisión Nacional Bancaria y de Valores "CNBV") or any other authority, in order for Evercore to carry out activities or render services that would otherwise require a license, registration or any other authorization for such purposes; neither is it regulated by the CNBV or any other Mexican authority. This document, nor its content, constitutes an offer, invitation or request to purchase or subscribe for securities or other instruments or to make or cancel investments, nor may it serve as the basis for any contract, commitment or decision of any kind.

For persons in the UK: In making this report available, Evercore makes no recommendation to buy, sell or otherwise deal in any securities or investments whatsoever and you should neither rely or act upon, directly or indirectly, any of the information contained in this report in respect of any such investment activity. This report is being directed at or distributed to, (a) persons who fall within the definition of Investment Professionals (set out in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order")); (b) persons falling within the definition of high net worth companies, unincorporated associations, etc. (set out in Article 49(2) of the Order); (c) other persons to whom it may otherwise lawfully be communicated (all such persons together being referred to as "relevant persons"). This report must not be acted on or relied on by persons who are not relevant persons.

For persons in Switzerland: The distribution of these materials to persons or entities in Switzerland is not intended to, and does not, constitute a financial service under the Swiss Financial Services Act (FinSA). In particular, the distribution of these materials does not constitute the provision of personal recommendations on transactions with financial instruments (investment advice) within the meaning of Article 3(c)(4) of FinSA.

For persons in Australia: Evercore does not have an Australian Financial Services License ("AFSL"). This report is only to be distributed to persons who fall within the definition of "wholesale" investors under section 761G of the Corporations Act 2001 (Cth). This report must not be acted on or relied on by persons who are not wholesale investors. Evercore relies on the relief provided under ASIC Corporations (Foreign Financial Services Providers—Limited Connection) Instrument 2017/182 to provide this report to wholesale investors in Australia without an AFSL.

For persons in New Zealand: This material has been prepared by Evercore Group L.L.C. for distribution in New Zealand to financial advisors and wholesale clients only and has not been prepared for use by retail clients (as those terms are defined in the Financial Markets Conduct Act 2013 ('FMCA')). Evercore Group L.L.C. is not, and is not required to be, registered or licensed under the FMCA, and unless otherwise stated any financial products referred to in this material are generally only available in New Zealand for issue to those satisfying the wholesale investor criteria in the FMCA.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: <https://evercoreisi.mediasterling.com/disclosure>.

In compliance with the European Securities and Markets Authority's Market Abuse Regulation, a list of all Evercore ISI recommendations disseminated in the preceding 12 months for the subject companies herein, may be found at the following site: <https://evercoreisi.mediasterling.com/disclosure>.
